Living Wall Systems

Ambius landscape Living wall system is lightweight & easy to install. This modular system has inbuilt irrigation and drain. Longevity enabled growth media, universal applicability, ease of handling are the other unmatched features. It can make use of any kind of substrate, Ambius landscape growth medium or Living foam the hydrophilic substrate. There is no need to water continuously. Panels are pre-grown before installing on wall. So the wall is Green on first day itself.

Landscape garden designs

All our work is an exploration of the world and an exercise in how we can change the perception of an environment by modifying its natural building blocks.

about

We're building
sustainable ways to create beauty
a whole new world
creative ways to harness nature

**Into the green we go
To sculpt the world into what we imagine**

We've been shaping India's landscape since 2014 under the aegis of renowned landscape Designer Mr. Vinod Mor

A distinguished fellow of the Indian Society of Landscape Designer and Developer . Ambius landscape , of our eponymous firm, has had a storied career in which he's dedicated himself to transforming the world he sees. He has learnt and honed his craft for decades, and has worked with two of India's premier landscape consultancy firms before embarking on his own independent journey. At Ambius landscape , he is bringing intention, sustainability and an unmatched vision to the science and art of landscape design and developers.

Our values

Listen, explore, learn

We're guided by the rhythm of nature and the ever-evolving landscape of design. We listen to everything, explore everything that catches our eye, and learn from every medium, partner, project, and collaborator. This allows us to maximise today's possibilities and to anticipate the future.

Ideas come through dialogue

The hallmark of genius is collaboration, and so we bring diverse voices into every project so spark the next big idea. We talk, discuss, debate, even argue, and that's what provokes the freshest ideas that speak to the needs and aspirations of all.

Art and evidence must coexist

We blend an artist's palette with a scientist's precision to find a balance between aesthetics and practicality. Everything that is beautiful serves a purpose. Everything that has function is also a piece of a larger (beautiful) canvas.

We are committed to provide top class innovative solutions and excellent service delivery experience to our clients.

We believe in innovation & improvisation. We enhance our skills & update our technologies to give site-specific solutions.

MISSION

Ambius landscape is committed to the creation and delivery of eco-friendly products that blend harmoniously with nature. Ambius landscape aims to make these sustainable green technologies a safe, easy and reliable way for the benefit of future generations & environment.

Leading the Horticulture and Landscape Industry by:

1. Research, development and Innovation of green methods and systems, required for sustainable landscape garden and terrace gardening.
2. Developing sustainable, cost-efficient, light-weight, stable growth-media.
3. Developing, producing and providing sustainable, environment-friendly products/services with warranties, required for creating biophilic-spaces and energy-efficient green-buildings to combat climate change.

CORE VALUES

1. We are committed to provide top class innovative solutions and excellent service delivery experience to our clients.
2. We believe in innovation & improvisation. We enhance our skills & update our technologies to give site-specific solutions.
3. We honour & fulfill our commitments & ensure that we are fair and transparent to all, our employees, clients and business associates.
4. We intend to inspire people to create Green spaces & promote innovative urban garden techniques.
